

Hey! Are there any weird Gutter Guys out there?

You know—half round...or copper...or galvanized, instead of normal aluminum types. **We stock a full line of copper and galvanized** in half round and K-style, in both 5" and 6", but I'm too lazy to put them in our catalog. So, if you've got this kind of work, call Petit for a quote. We carry it all—from copper pop rivets, to fancy funnels, even bar solder.

NEW

Custom crafted by PETIT and approved for use by Gutter Guys like you!

Speaking of soldering, look at this "WHATZ-IT"! It's our genuine, brand spanking new, precision machined, custom fabricated, professional quality, Jed Clampit approved...

Half Round Gutter Clamp

With this baby in your toolbox, perfect joints are child's play!

5" \$149⁰⁰ **HRGC5**

6" \$159⁰⁰ **HRGC6**

FREE ADVICE

(Some say it's worth less than you pay for it, but I'll give it to you anyway.)

If you hang gutters with screws, you need to set the clutch properly. Whether you use a weeny 7.2 volt or mighty 18 volt driver, they all pack enough torque to weaken the shank, leading to "premature head failure", which is as bad as it sounds. You want to drive the screw until it just pulls the hanger up tight; an extra quarter turn and the heads may pop with a heavy ice load. We sell a couple of different hangerscrews; they are priced the same so you will have to tell us if you have a preference. Eyeball the photo and you can see some of the different features:

Petit Custom #11 x 1 1/2

Max Torque 107 in lbs.
Packaging 3,000/Bulk Box
Finish Bright Galvanized with Wax

Woodgrip #10 x 1 1/2

Max Torque 90 in lbs.
Packaging 2,500/10 bags of 250
Finish Hot Dip Galvanized

Conventional #10 x 1 1/2

Max Torque 75 in lbs.
