

PETT WRAPAROUND PIPE BAND

It's New...It's Neat!
It's About Time!!!

- HEAVY ALUMINUM STOCK FOR STRENGTH AND DURABILITY
- SIMPLE, TASTEFUL DESIGN
- VERSATILE—EASY TO MOUNT ON MOST TYPES OF CONSTRUCTION
- MAKES EVERY JOB LOOK NEAT AND PROFESSIONAL

Houses used to be built with corner trim boards all ready for you to simply mount your downspout with traditionally styled pipe bands. But now most houses have modern siding and only narrow corner trim. That's where our new Wraparound Pipe Band comes into play. Prebend the back half of the band and fasten it to the house with the holes that fit best on that type of construction. Mount your downspout and then wrap the pipe band around, overlapping the other end, and fasten it to the pipe. Looks so nice, you have to step back and admire your work...after you get down off the ladder!
