

the **VAMPIRE** T-BAR GUTTER HANGER™

- **REDUCES INSTALLATION TIME - ACTUAL ON THE JOB TIME IS 1/3 LESS THAN OTHER T-BAR HANGERS.**
- **CAN BE INSTALLED ON THE GROUND AS THE GUTTER IS BEING FORMED.**
- **MORE THAN TWICE THE STRENGTH OF CONVENTIONAL WRAP-AROUND OR SPIKES.**
- **COMPATIBLE WITH ALL TYPES OF SEAMLESS GUTTERS.**
- **ALL ALUMINUM CONSTRUCTION ELIMINATES ELECTROLYSIS PROBLEMS.**
- **REDUCES COSTS, ALLOWING INSTALLATION ON 32" CENTERS.**

The key to the strength of Petit Tool's vampire hanger lies in the superior design and quality construction. The Vampire T-Bar is precision stamped from .063" aluminum. To assemble our final product we demanded a rivet with strength and consistent high quality. We couldn't find a rivet to meet our standards, so we manufacture our own. In the final assembly process our rivets are spun to achieve maximum strength.

The installation process joins this pre-fabricated hanger to the gutter in a unique manner which assures the strength of the final installation. The two prongs on the hanger (The Vampire Fangs) pierce through the back of the gutter and are bent up for permanent attachment to the gutter.

Millions of Vampire hangers have been installed all over the country since 1970, with nothing but satisfying results. We have even received letters from people who have been saved from falling off their roof by the strength of our hangers.
